

Vision: Keep the Green in Greenville

Mission: Keep the “Green in Greenville” by coordinating and championing the efforts of community groups and local agencies to protect and enhance Greenville County’s diverse and vibrant natural resources.

We will do this by:

- Coordinate the efforts and raise the visibility of community groups and individuals focused on keeping the green in Greenville.
- Help reforest and re-green portions of Greenville County where trees are aging or dying; and facilitate, coordinate and champion plantings of legacy trees, trees with an expected life span of over 100 years.
- Educate citizens, neighborhood groups and developers on the value of Greenville County’s natural resources.
- Encourage the preservation and expansion of green spaces throughout Greenville County.
- Promote and utilize technologies for green.
- Assist and support community groups in fundraising efforts.
